

GPs accessing Medical Director in ACFs

ThinPoint Server located within AHDGP

\$5000 + Client PC (approx \$1500)

- on own separate secure network
- can allow up to 40 simultaneous logons
- Medical Director installed for each ACF here
- Patient MD data is imported from GP practice database to ACF database where it is now managed and maintained

Benefits to ACFs:

- No additional software support/maintenance needed. ThinPoint Server allows all MD updates to be applied once on the server, making it available to all users
- Each ACF has their own secure MD database of patients, only accessible by their authorised GPs or ACF staff
- Connections to the Thinpoint server & MD can be made from any PC with Internet access
- GPs only need to be given a logon to ACF network with minimum privileges (Internet access & printing)

Benefits to GPs:

- Can access patient's record from any PC in ACF with Internet access or from any of their practice's PCs
- Can print/update drug charts from ACF or practice
- Logging on will work in exactly the same way in every location making it a simple process for GPs who work in multiple ACFs

Benefits to AHDGP:

- MD Software maintained for all site from one location quickly and easily
- ThinPoint creates stable, reliable connections requiring minimal troubleshooting/ongoing support
- ThinPoint hardware can also be used to provide additional secure services to GPs & ACF staff (eg hosting sample software for testing/training purposes)
